## *The Resilient Dune #2*

---

*Endure is an Interreg 2 Seas project funded by ERDF\**

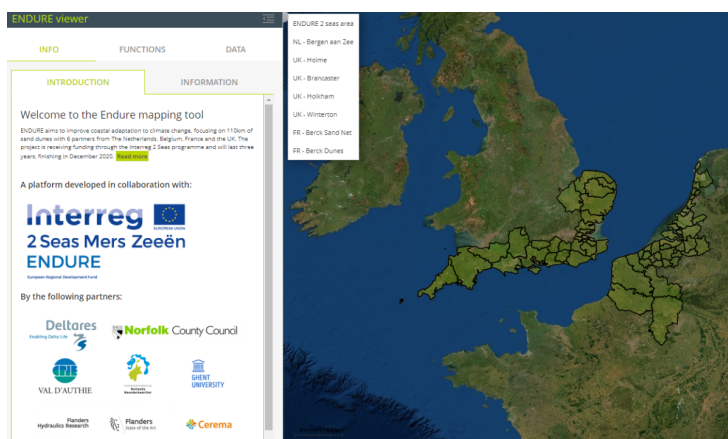

After a year that felt like it lasted 1,000 days, the ENDURE project is thrilled to have completed two outputs and we are delighted to share these with you in our second newsletter !

## Do not miss our Tool Showcase in May!

The ENDURE showcase will run on four dates in May 2021, presenting tools created to support decision making in dune regions.

Registration is required and all presentations are available in English, French and Dutch.

## ENDURE NEWS

### Do mussel posts have a positive impact?

Along the coast of the Hauts de France, various mussel farms can be found. These farms are formed by rows of piles, liable to generate sand deposits forming protection for the dune lines at the top of the beach.

Project Partner Cerema analysed over 20 years of biannual topographic

---

## Sand net testing success!

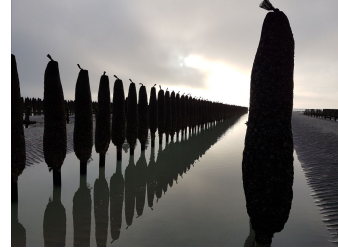

Following the installation of sand nets in the Baie de l'Authie in 2019, ENDURE partner Cerema highlight their interesting findings and make recommendations for future development.

Respect and Protect your dunes!  
We've produced a video to encourage people to help protect their dunes. [Find out more here.](#)

measurements of beach profiles to [identify trends](#).

---

**Closing Conference -  
Save The Date!**

**21 Sep**

Norfolk County Council will host the ENDURE 'Ensuring Dune Resilience' Closing Conference on 21 September 2021 in Norwich, UK and online. Registration for the event will open soon. See our '[Closing Conference](#)' pages.

---

### Ensuring Resilience

Norfolk County Council have been working to [test new ways](#) of managing visitor pressures on sand dunes through various means including the development of a Visitor Management Plan, a dune warden and people counters.
